PROJECTS

Student Management System (Eclipse, SQL Yog, Java)

College

- Developed a system for student results with CRUD functions.
- Authenticated users to manage student information.
- Administrators can add, update, and delete student records.

Project Highlights:

- Used Eclipse as the Integrated Development Environment (IDE).
- Utilized SQL Yog as the database management tool.
- Deployed the application on a Tomcat server.
- Implemented the application using Java.

Panipuri Paradise Project (Spring STS, Java, HTML & CSS) *Personal Small Project*

- Developed a restaurant service tool allowing users to view and scan menu
- Developed using SPRING STS, HTML & CSS, Java.

Smart Grocery List App (Spring STS, Java) *Web-based Application*

- A web-based application designed to help users efficiently manage their grocery shopping.
- Allowing users to maintain grocery lists, track existing items, and receive reminders for essential restocks, with login and registration functionality for a personalized user experience.
- Helps users avoid forgetting items or purchasing duplicates, making grocery shopping more organized and efficient.

CERTIFICATES

- Programming In JAVA through NPTEL Online (July to Oct 2023).
